# FAIRING INSTALLATION
# BRACKET 59

1. Install the fairing according to the drawing below.
2. Install the clear windshield with item 13.
3. Fix the items 5, 1 and 2 at the base of the handlebar with the items 6, 7 and 8, **without tightening**.
   Note: To make it easier, remove the plastic on the front of the handlebar and reinstall it after the placement of items 1 and 2.
   The items 1 and 2 must be placed as high as possible (See picture) .
4. Install items 3 and 4 as near as possible of the handlebar using the items 9, 11 and 12, **without tightening** (see picture).
   Note: In some cases you may have to move the flange of the hand-brake lever.
5. Install the fairing with items 1, 2, 3, 4, 10, 11 and 12, **without tightening**.
6. Adjust position for all items.
   Note: In some case, you may have to adjust the handlebar at the good angle to install the fairing correctly.
7. Make sure to tight the bolts sufficiently to prevent parts from vibrating loose.
8. Verify the clearance of the fairing by turning the handlebar. Make sure to clear the shifter and other accessories installed close to the handlebar of the vehicle.

**IMPORTANT: Ensure you to keep enough space to operate the brake lever easily.**

Détail 13

## Parts list

| Ref. | Description | Item # (OEM) | Qty. |
|------|-------------|--------------|------|
| 1 | Fairing angle right | 04WA-009D | 1 |
